

Give Your Body What It Needs To Fight Back

Comprehensive Immune System Support

All-Natural,
Non-GMO

Doctor
Formulated

Vegan
Friendly

Satisfaction
Guaranteed

Immune Threats Are Lurking Around Every Corner

Every day, infectious threats put your immune system under fire. Stress, bacteria, viruses, and more can weaken your immune system and leave your body vulnerable. But now, you can fight back by supporting both immune system responses.

The Innate Immune System

This is our first line of defense. It includes our skin, stomach acid, cough reflex, and mucus. The innate response doesn't discriminate and attacks all invaders equally because it cannot distinguish between specific pathogens.

When it fails to completely overcome a toxic or microbial threat, it hands off the fight to the adaptive immune system.

The Adaptive Immune System

This system takes and stores "fingerprints" of each invader and attacks its weaknesses. By keeping copies of each pathogen, or "fingerprint", in its memory, the adaptive immune response gets stronger and more effective over time.

This is known as "acquired immunity" and it's the strongest protection the body can have against any invading threat.

If You Want Comprehensive Professional Strength Support...

**You Need
Advanced Immune Support!**

What's in the Advanced Immune Support?

Advanced Immune Support brings you a never-before seen collection of clinically-studied ingredients proven to support your immune system.

Real Vitamin C & Antioxidants

Made from broad-spectrum bioflavonoids, including quercetin, that works synergistically to help our bodies produce and regulate vital immune cells that identify, contain, and neutralize potentially harmful pathogens.*

BerryShield® Elderberry Concentrate

The non-GMO concentrate made from Haschberg "farm-to-finish" elderberries contains all available actives, unlike extracts, for a more potent and effective product. It's associated with a reduced duration and severity of cold and flu symptoms.*

Vitamin D3 & Zinc

These two powerful nutrients are essential for immune health and function. They help boost the production of immune proteins and limit natural inflammatory responses from getting out of control.*

Selenium

Selenium has been studied extensively for its effects on viral immune responses. Many studies are now suggesting that sufficient selenium intake may help slow the replication and mutation of certain viral infections.*

Reishi Fruiting Body Extract

Reishi is frequently touted for its high 1,3-beta-glucan and 1,6-beta-glucan content and is recognized as adaptogen due to its potential to support adrenal health and cortisol regulation.*

N-Acetyl Cysteine (NAC)

This potent semi-essential amino acid is a powerful antioxidant and precursor to the "Master Antioxidant", glutathione. NAC is used to help ease symptoms of respiratory conditions by acting as an expectorant and improving glutathione activity in the lungs. Studies also show NAC to have a positive effect on lymphocyte immune cells.*

Beta Glucan / BFG-Immune®

This highly purified 1,3-Beta-Glucan is produced through a unique fermentation process. Innate immune defense responses and immune cell bindings are specific to 1,3 linkages and can mobilize a complex set of mechanisms including targeted immune cell activation.*

ResistAid® Larch Arabinogalactan

In a placebo-controlled, double-blind, randomized clinical trial, ResistAid® was shown to significantly reduce the occurrence of viral cold episodes and the duration of cold symptoms compared to a placebo. Additional studies suggest larch arabinogalactan may increase the effectiveness of natural killer T-cells.*

Olive Leaf Extract

With a long history of use in the Mediterranean, olive leaf extract helps support a healthy and balanced immune response. An 8-week study suggests it may positively alter white blood cell responses. Additional studies have also linked olive leaf extract with limited bacterial and viral replication.*

Humic & Fulvic Extract

These key ingredients not only have strong antibacterial and antiviral properties that may help reduce the severity and duration of infections. But they also help optimize the absorption of EVERY ingredient in Advanced Immune Support.*

Supplement Facts		
Serving Size 6 Capsules		
Servings Per Container 30		
	Amt/Serv	% DV*
Vitamin C Non-GMO Ascorbic Acid	900 mg	1000%
Organic Vitamin C Whole Food Blend from Acerola, Amla, and Camu Camu fruit	300 mg	*
Organic Citrus Bioflavonoids from Oranges, Lemons, and Tangerines	100 mg	*
Quercetin	500 mg	*
Elderberry Concentrate as BerryShield®	500 mg	*
Vitamin D3 as Cholecalciferol (5000 IU)	125 mcg	625%
Zinc as Zinc Ascorbate	22 mg	200%
Selenium as L-Selenomethionine	110 mcg	200%
NAC N-Acetyl Cysteine	500 mg	*
Reishi Fruiting Body Extract (>35% Beta Glucans)	300 mg	*
BGF-Immune® (High Purity 1,3 Beta-Glucan)	100 mg	*
Humic and Fulvic Extracts	100 mg	*
ResistAid® Larch Arabinogalactan	200 mg	*
Olive Leaf Extract	100 mg	*
Other Ingredients: Veggie capsules		
* Percent Daily Value not established
